PEMBERTON®

CONTENTS

PG. 3 & 5:

- BASKET SORTING GRAPPLE
- GARBAGE PACKING GRAPPLE
- LOG GRAPPLE
- CAR BODY GRAPPLE 2/3 (HANGING)
- CAR BODY GRAPPLE 3/4 (HANGING)
- CAR BODY GRAPPLE 4/5
- CAR BODY GRAPPLE 2/3 (OUT OF POSITION)
- CAR BODY GRAPPLE 3/4 (OUT OF POSITION)

PG. 6 & 7:

- CAR BODY GRAPPLE 4/5 (OUT OF POSITION)
- LOG/POLE GRAPPLE
- GY-SERIES ORANGE PEEL GRAPPLE
- STD. ORANGE PEEL GRAPPLE
- CROSSTIE/BUNDLE GRAPPLE
- ROCK GRAPPLE
- BALE GRAPPLE
- CLAMSHELL BUCKET

PG. 8 & 9:

- EGR GRAPPLE (WT)
- EGR GRAPPLE (NT)
- HIGH VOL. MAT. GRAPPLE (NT)
- CONCRETE DENSIFIER
- POWER PICKER
- ROTATING POWER PICKER
- PES 100 MOBILE SHEAR
- ROTATING MAT. SORTING TOOL

PG. 10 & 11:

- WOOD SHEARS
- STICK SHEARS
- SLAB BUCKET
- TIRE GRAPPLE
- CITRUS RAKE WITH HYDRAULIC PADDLE CLAMP
- EXCAVATOR RAKE
- LOADER RAKE
- LOADER RAKE LONG TOOTH STACKER

PG. 12 & 13:

- LOADER RAKE WITH END CLAMPS
- LOADER RAKE FULL PADDLE WITH TEETH
- LOADER RAKE WITH DUAL WIDE PADDLE
- LOADER RAKE FULL PADDLE WITHOUT TEETH
- SCRAP GRAPPLE
- TRASH BUCKET WITH CLAMPS
- ROLLOUT BUCKET WITH CLAMPS
- ROLLOUT BUCKET

PG. 14 & 15:

- TWIST-O-WRIST BUCKET
- AQUATIC DITCH BUCKET
- DITCH BUCKET
- EXC. SKELETON ROCK BUCKET
- EXC. TRAPEZOIDAL BUCKET
- EXC. GEN. PURPOSE BUCKET
- LIGHT MATERIAL BUCKET
- WOOD CHIP BUCKET

PG. 16 & 17:

- TAMPING REFUSE BUCKET
- LONG LIPPED WASTE TAMPING BUCKET
- DEMOLITION BUCKET
- GENERAL PURPOSE BUCKET
- MULTI-PURPOSE BUCKET
- REFUSE BUCKET
- SKELETON BUCKET
- SPADE/STRAIGHT EDGE ROCK BUCKET

PG. 18 & 19:

- SCRAP BUCKET WITH CLAMPS
- BUCKET FORKS
- ROTATING FORKS
- CAR HANDLING FORKS
- CAR BODY FORKS
- PIPE FORKS
- CAR CRUSHING FORKS

PG. 20 & 21:

- PIPE-N-POLE FORKS WITH CLAMPS
- UTILITY CONSTRUCTION FORKS
- HYDRAULIC ADJUSTABLE FORKS
- MILLYARD FORKS
- LOG FORK WITH HYDRAULIC TOP PADDLE CLAMP
- RIPPER SHANK
- EXCAVATOR STUMPER
- ENGINE PULLER

PG. 23 & 24:

- EXTENDABLE BOOM
- MANUAL THRU-PIN THUMB
- HYDRAULIC THRU-PIN THUMB
- HYDRAULIC UNDERSTICK THUMB
- MANUAL UNDERSTICK THUMB
- LIFTING MECHANISM
- BALDERSON COUPLER
- PEMBERTON "L" SERIES COUPLER

PG. 25:

- JRB COMPATIBLE COUPLER
- RAILCAR COUPLER
- STUMPER/THUMB COMBO

WE EXCEL AT
**CUSTOM
ENGINEERING**

MADE IN THE 

WE HELP DELIVER MACHINES QUICKER.™

BASKET SORTING GRAPPLES

- Ideal for wood, construction, demolition, recycling, landfill and transfer station applications
- Heavy duty rotator with oversized slew ring
- Standard with full 360 degree rotation

GARBAGE PACKING GRAPPLES

- Ideal for use in trash transfer stations
- Evenly distributes and maximizes loads for transport vehicles
- Available in custom widths and capacities
- 360 degree continuous rotation
- Oversized heavy duty slew ring

LOG GRAPPLES

- Oversized rotator
- O Ring grease seals at all pivot points
- Hardfacing on tines
- Extremely durable 5000 PSI hydraulic cylinders
- Available in four sizes

CAR BODY GRAPPLES 2/3

- Ideal for rip rap, demolition, scrap, and other harsh applications
- Heavy duty boxed tine fabrication
- High pressure cylinders
- Replaceable weld on tips
- Hardened steel pins and bushings

CAR BODY GRAPPLES 3/4

(Hanging)

- Ideal for brush, logging, construction, demolition and storm clean up
- Heavy duty boxed tine fabrication
- Heavy duty oversized slew ring
- High pressure cylinders
- Hardened steel pins and bushings

CAR BODY GRAPPLES 4/5

(Hanging)

- Ideal for solid waste, household trash, brush, storm clean up and other bulk applications
- Available for excavators and material handlers
- Hardened steel pins and bushings

CAR BODY GRAPPLES 2/3

(Out of Position)

- Ideal for rip rap, demolition, scrap, and other harsh applications
- Hardened steel pins and bushings
- Requires two auxiliary hydraulic functions
- High pressure cylinders

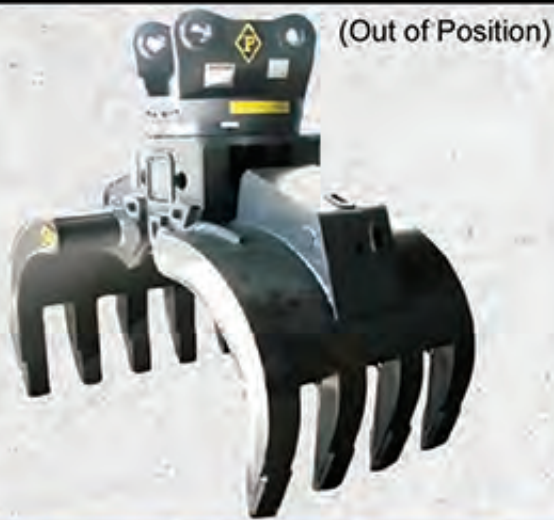

CAR BODY GRAPPLES 3/4

(Out of Position)

- Ideal for solid waste, household trash, brush, storm clean up and other bulk applications
- Hardened steel pins and bushings
- Requires two auxiliary hydraulic functions

CAR BODY GRAPPLES 3/4

- Ideal for solid waste, household trash, brush, storm clean up, and other bulk applications
- Replaceable weld on tips
- Requires two auxiliary hydraulic functions

LOG / POLE GRAPPLES

- Used in the logging industry
- Also used for moving and maneuvering poles
- Rounded tine ends to prevent pole damage
- Double pivot points opening and closing stops

GY-SERIES ORANGE PEEL GRAPPLES

- Ideal for scrap metal sorting and loading
- Fully guarded 5000 PSI cylinders
- Hardened steel pins and bushings
- 360 Degree rotation with oversized slew ring

STANDARD ORANGE PEEL GRAPPLES

- Ideal for scrap metal sorting and loading
- Fully guarded 5000 PSI cylinders
- Hardened steel pins and bushings
- 360 Degree rotation with oversized slew ring

CROSSTIE / BUNDLE GRAPPLES

- Used in handling bundled railroad cross-ties
- Gripping snags inside grapple arms that help grip the wood
- 360 degree continuous rotation

ROCK GRAPPLES

- Used in removal and placing of large rock
- AR500 replaceable inserts and tips
- Used on excavators up to 200,000 lbs.

BALE GRAPPLES

- Used for handling baled steel or aluminum and other products in a cubed form
- High strength material
- 360 degree continuous rotation

CLAMSHELL BUCKETS

- Capacities from 1/2 to 8 yards
- Heat treated pins, bushings and grease fittings at all hinge points
- Available with continuous 360 degree hydraulic rotation or knock around unit

EGR GRAPPLE (WIDE TINE)

- Various applications including demolition, scrap, wood waste, rip rap, storm clean up, road and bridge work and all recycling applications
- Heavy duty wide boxed tine configurations

EGR GRAPPLE (NARROW TINE)

- Various applications including demolition, scrap, wood waste, rip rap, storm clean up, road and bridge work and all recycling applications
- Heavy duty narrow tine configurations

HIGH VOLUME MATERIAL GRAPPLES (NARROW TINE)

- Various applications including demolition, scrap, wood waste, rip rap, storm clean up, road and bridge work and all recycling applications
- Heavy duty narrow tine configurations

CONCRETE DENSIFIERS

- For processing concrete slabs, pilings, precast poles, RCP pipe, steel encased beams and silos
- AR-Replaceable weld in teeth
- Optional rebar cutters in throat

POWER PICKERS™

- Ideal for use in auto recycling and scrap yards
- Sorting wanted and unwanted materials from roll offs
- Aids in removal of car motors
- Separates metals, concrete, wood, tires and more

ROTATING POWER PICKERS™

(For: 40k - 55k lb. excavators.)

(360 degree continuous rotation)

- Ideal for use in auto recycling and scrap yards
- Sorting wanted and unwanted materials from roll offs
- Aids in removal of car motors
- Separates metals, concrete, wood, tires and more

PES 100 MOBILE SHEARS

(Only size AVAILABLE. For: skid steers and 20K class excavators.)

(2nd or 3rd member HOOK-UPS)

- Ideal for interior demolition, scrap yards, recycling centers for ferrous and non-ferrous metals
- 360 degree continuous rotation
- Light in weight, yet compact matched for machine

ROTATING MATERIAL SORTING TOOL

(360 degree continuous rotation)

- Ideal for interior demolition, picking and sorting
- Sorting wanted and unwanted materials from roll offs
- 360 degree continuous rotation
- Ideal for 12k to 18k lb. mini/compact excavators

WOOD SHEARS

- Ideal in land clearing, downsizing wood, stumps and wood products in preparation for grinding
- High tensile steel construction

STICK SHEARS

(3 Models AVAILABLE. For: 45k - 110k lb. excavators)

- Ideal for downsizing all types of structural materials, (ie: tubing, beams and piping)
- Designed for maximum cutting force
- Replaceable weld on piercing tip

SLAB BUCKETS

- Ideal for pavement, bridge deck and concrete removal
- Move large slabs of intact material easily
- Available with standard teeth to customer specifications
- Custom widths and throat diameters

TIRE GRAPPLES

- Ideal for bulky tire loading and handling
- Available with paddle style clamp or dual paddle clamps to retain bulky tire loads
- Capacities from 2 to 20 yards
- Pin On and various coupler hook ups available

CITRUS RAKE WITH HYDRAULIC PADDLE CLAMP

- Engineered for optimal performance in citrus tree removal, minimizing damage to surrounding trees and fruit
- Fits all standard 2 to 4 yard loaders
- Pin On and various coupler hook ups available

EXCAVATOR RAKES

- Ideal for land clearing applications
- Long curved tooth design maximizes capacity
- Optimize performance by pairing with Pemberton hydraulic or manual thumb

LOADER RAKES

- Ideal for land clearing, grubbing and loading of wood waste materials
- Heavy duty alloy steel construction ensures high strength and long term durability

LOADER RAKES LONG TOOTH STACKER

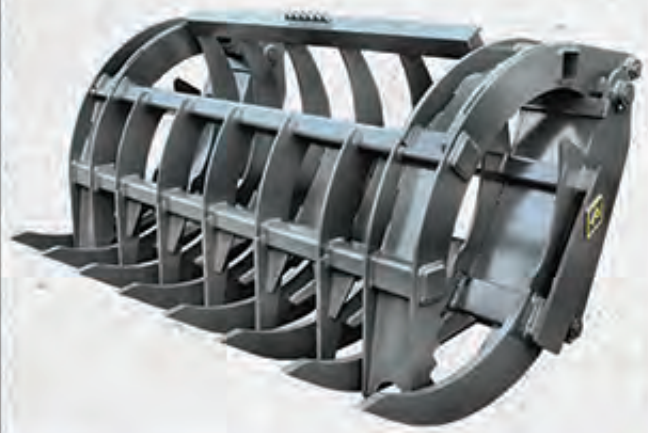

- Ideal for land clearing
- Heavy duty alloy steel construction ensures high strength and long term durability
- Longer bottom teeth for enhanced loading and stacking applications

LOADER RAKES WITH END CLAMPS

- Ideal for land clearing, storm/debris clean up, and all wood waste applications
- Ideal for maximum retention of uneven loads
- Pin On and various coupler hook ups

LOADER RAKES WITH FULL PADDLE AND TEETH

- Ideal for land clearing, storm/debris clean up, and all wood waste applications
- Ideal for maximum retention of uneven loads
- Pin On and various coupler hook ups available

LOADER RAKES WITH DUAL WIDE PADDLE

- Heavy duty alloy steel construction, ensures high strength and long durability
- Available in dual wide paddle top clamps with paddle teeth
- Dual paddle clamps are independent for maximum load

LOADER RAKES FULL PADDLE WITH NO TEETH

- Ideal for land clearing
- Maximum load retention of full length loads
- Pin On and various coupler hook ups available

SCRAP GRAPPLES

- Ideal for bulk scrap handling
- High radius to clamp for retaining load
- Heavy duty construction for rough applications
- Replaceable tips
- Pin On and various coupler hook ups available

TRASH BUCKETS WITH CLAMPS

- Ideal for use in transfer stations, scrap yards, garbage, refuse & recycling facilities
- Available in 2 to 12 yard capacities
- Pin On and various coupler hook ups available

ROLLOUT BUCKETS WITH CLAMPS

- Ideal for loading high top trailers with bulky debris and needing extra dump height
- Requires two auxiliary hydraulic functions
- Available from 2 to 15 yard capacities

ROLLOUT BUCKETS

- Increases loader dump height 24" to 36" over standard
- Heavy duty hydraulic cylinders
- Available in 2 to 15 yards capacities
- Various widths available
- Pin On and various coupler hook ups available

TWIST-O-WRIST BUCKETS

(Tilt Bucket)

- Ideal for ditching, sloping, grading, back filling and clean up operations
- Tilts 45 degree angle in two directions
- Available in .75 to 3.0 cubic yard capacities

AQUATIC DITCH BUCKETS

- Ideal for cleaning of water ways, canals and drainage areas (vegetation, weeds and more)
- Available in 48 to 96" widths
- Optional bolt on edges available (straight or serrated)

DITCH BUCKETS

(AVAILABLE with or without holes)

- Ideal for cleaning of water ways, canals and drainage areas
- Wider and shallower than general purpose bucket
- Available in 48 to 96" widths
- Optional bolt on edges available

EXCAVATOR SKELETON ROCK BUCKETS

- Ideal for sifting larger sized rocks as well as separating various sizes of rip rap and/or crushed materials
- Comes standard with teeth
- Optional side cutters and anti clatter bushings

EXCAVATOR TRAPEZOIDAL BUCKETS

- Ideal for shaping ditches
- Custom built to customer specifications
- Slopes, widths and capacities vary
- Suitable for 25,000 to 150,000 lb. excavators

EXCAVATOR GENERAL PURPOSE BUCKETS

- Ideal for use in utility work, road building, residential/commercial construction and general dirt digging (where geography is not rocky)
- Comes standard with teeth
- Optional side cutters and anti clatter bushings

LIGHT MATERIAL BUCKETS

(4 - 20 Yard)

- Larger capacity designed specifically for lighter material
- Capacity and width determined by machine manufacturer specifications
- Custom design features available
- Comes standard with bolt on cutting edges

WOOD CHIP BUCKETS

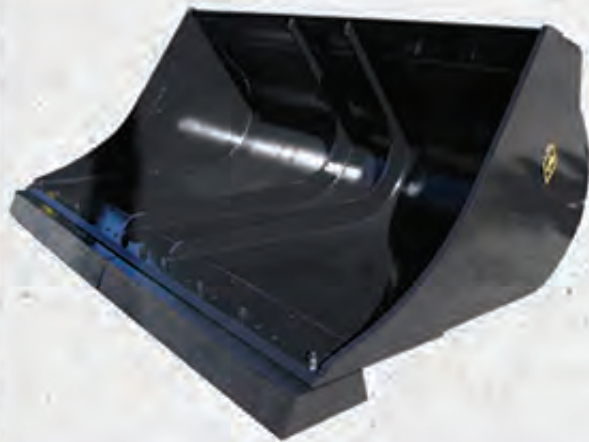

- Oversized capacity to increase production and reduce cycle times
- Available with expanded metal windows or slots for increased operator visibility
- Comes standard with bolt on cutting edges

TAMPING REFUSE BUCKETS

- For use in transfer station applications
- Used for both tamping and loading
- Removable top spill guard

LONG LIPPED WASTE TAMPING BUCKETS

- Used in waste transfer stations
- Available in 4 to 12 yard capacities
- Pin On or coupler equipped
- Comes standard with bolt on cutting edges
- Optional rubber edge is available

DEMOLITION BUCKETS

- Heavy duty clamp design made for dozing, piling and pushing
- Guarded cylinders and high strength materials
- Available in 2 to 6 yard capacities
- Complete demolition tool for loaders

GENERAL PURPOSE BUCKETS

- Ideal for general dirt work, utility and road building applications
- Designed with OEM hardware
- Comes standard with bolt on edges
- Optional teeth available
- Pin On and various coupler hook ups available

MULTI-PURPOSE BUCKETS

- Ideal for applications including storm clean up, grading, dozing, loading and light demolition
- Suitable for 1 to 5 yard loaders
- Available with weld-on teeth, bolt on teeth, segments or bolt on edge

REFUSE BUCKETS

- Specifically designed for use in waste transfer stations and tipping floor applications
- Design is also suited for dozing and piling
- Can be used in loading applications as well

SKELETON BUCKETS

- Ideal for sifting of large and small rocks
- Available in custom tine spacing configurations
- Comes standard with bolt on cutting edges
- Optional teeth and lip savers available
- Pin On and various coupler hook ups available

SPADE/STRAIGHT EDGE ROCK BUCKETS

- Straight Edge Bucket (bucket width and edge pattern drilled to accept specific OEM standard wear parts)
- Spade Nose Rock Bucket (Spade Nose designed for handling loose rock and digging)

SCRAP BUCKET W/ CLAMPS

- Used in the scrap recycling industry
- Comes standard with additional shell liners
- Wide oversized paddle clamps for retaining oversized loads

BUCKET FORKS

- Ideal for backhoes, tractors and wheel loaders
 - Forged tines (3:1 safety factor)
 - Comes standard with hooks, shaft and locking collars
- Available in 2,500, 4,000, 6,000, 8,000, 10,000, and 17,000 lb. capacities

ROTATING FORKS

- Ideal for dumping hazardous waste, scrap, garbage & any other materials in bins
- Forged tine or bin handling arms available
- Heavy duty oversized slew ring with 360 degree continuous rotation

CAR HANDLING LONG FORKS

- Ideal for handling cars end to end
- 9ft. to 16ft. lengths with vertical tines
- Rubber bumpers to ensure no damage to cars
- Heavy duty high tensile steel fabrication
- Carriage widths vary

CAR BODY FORKS

Slant Back Design

- Tine lengths range from 60" to 96"
- Non adjusting high tensile steel tines
- Heavy duty high tensile steel fabrication
- Carriage widths vary

PIPE FORKS

- Ideal for handling large and small length pipe
- Heavy-Duty, oversized shaft for maximum lifting capacity
- Extra wide frame/carriage equals stability for pipe handling

CAR CRUSHING FORKS

- Extra heavy duty construction throughout for maximum life
- 60", 72", 84" lengths available
- Pin On and various coupler hook ups available

PIPE-N-POLE FORKS WITH CLAMPS

- Replaceable hardened steel pins and bushings at all pivot points
- Hold down clamps open to a vertical position
- Pin On or various coupler hook ups available

UTILITY CONSTRUCTION FORKS

- Carriage widths available from 60 to 106"
- Tine lengths available from 48 to 96"
- Manually adjustable tines
- Non swing and swing options available
- Fixed or floating tines available

HYDRAULIC ADJUSTABLE FORKS

- Ideal for pipe, oil field, utility, and road work
- Ideal for placement of tines without man power
- Tine lengths 48 to 96"
- Carriage widths starting at 80" up to 120"

MILLYARD FORKS

- Ideal for log handling, loading and sorting
- Clamp configuration and tine contour designed to maximize load into throat of fork to handle bulk logs/trees
- Fabricated tine T-1 construction

LOG FORKS WITH HYDRAULIC TOP PADDLE CLAMP

- Ideal for sorting, loading and feeding the log deck
- Available with two clamps or full paddle
- Can handle single or multiple logs as well as stacks of lumber

RIPPER SHANKS

- Ideal for rock, pavement, ice, frozen ground, shale and roots
- Also works great for stumping and land clearing
- Single tooth design maximizes performance
- Multiple shank/tooth styles

EXCAVATOR STUMPERS

- Ideal for land clearing
- Removes stumps easily
- Optimize performance by using in conjunction with PEMBERTON hydraulic or manual thumb

ENGINE PULLERS

- Most economical way to pull engines on salvaged vehicles
- Two unique styles offered
- Heavy duty hydraulic cylinders
- Grease fittings at all hinge points

EXTENDABLE BOOMS

- Ideal for long reach material handling applications
- High strength tubular steel construction
- All booms are manually extendable
- Available in pin on or various coupler hook ups

MANUAL THRU-PIN THUMBS

- Used in land clearing, demolition and recycling
- Ideal for contractors devoting a machine to thumb applications
- Thumb ears straddle bucket mounting ear group and longer pin is supplied

HYDRAULIC THRU-PIN THUMBS

- Approximately 140 degree range of motion
- Cylinder gives the operator ability to load material then dig without leaving the cab of machine

HYDRAULIC UNDER STICK THUMBS

- High strength one piece base plate
- Heavy duty pivot pin to resist bending
- Attaches directly to the underside of dipper arm
- Serrated edges for superior holding

MANUAL UNDER-STICK THUMBS

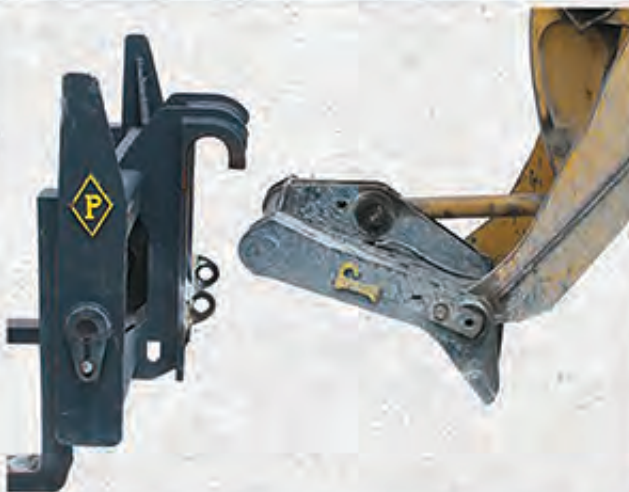

- High strength one piece base plate
- Heavy duty pivot pin to resist bending
- Attaches directly to the underside of dipper arm
- Serrated edges for superior holding

LIFTING MECHANISM

- Used on excavators 45,000 to 100,000 lbs.
- Pin On or various coupler hook ups available (extra pins required)

BALDERSON COUPLERS

- Balderson Interchangeable couplers (hydraulic only)
- Interchangeable with Balderson attachments

PEMBERTON "L" SERIES COUPLERS

(Dual Vertical Wedge)

- Interchangeability from 2 to 4 yard size loaders
- Push block design shock loads are absorbed through the loader lift arms, not the coupler
- Manual coupler is easily converted to hydraulic with a conversion kit

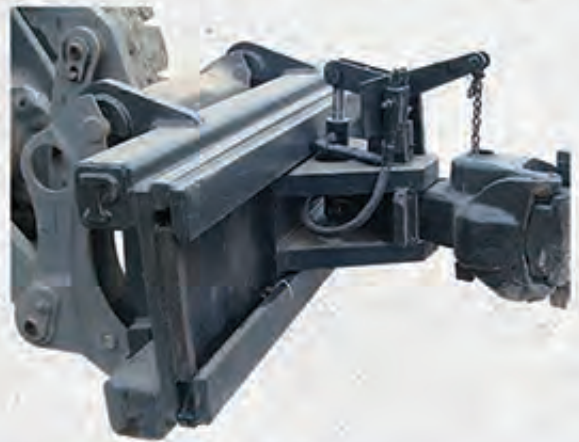

JRB COMPATIBLE COUPLER

(416, 418, 420)

- "JRB" series hydraulic coupler
- Heavy structural bottom beam for strength and rigidity, eliminates cracks and/or failures
- Total visibility through center of coupler

RAILCAR COUPLER

- Ideal for moving railcars with wheel loader.
- Available in rear/front mounts
- Variuos coupler hook-ups
- Offered in manual slide and hydraulic slide
- Standard with manual pin lift, hydraulic pin lift optional

STUMPER / THUMB COMBO

- Heavy duty land clearing and tree stumping applications
- Two prong stumper works in conjunction with heavy duty three prong main pin manual thumb
- Made with abrasion resistant materials
